

Assistance PSO for Microsoft Dynamics™

Enterprise

Assistance PSO for Microsoft Dynamics™ Enterprise is fully integrated with Microsoft Dynamics AX™ and offers the high end of the market all the options one would expect of an ERP application. The application is aimed entirely at the professional service sector. Integrated Innovation does not require you to make concessions, only to choose the best applications available

The service providers' trinity

The Enterprise version is integrated with Microsoft Dynamics AX™ and is a solid financial platform that meets the requirements of large service providers. Integration with Microsoft Dynamics CRM™ is also an option. With Assistance PSO for Microsoft Dynamics™ Enterprise, you have the most complete version at your disposal, without having to make any concessions.

Multi-company

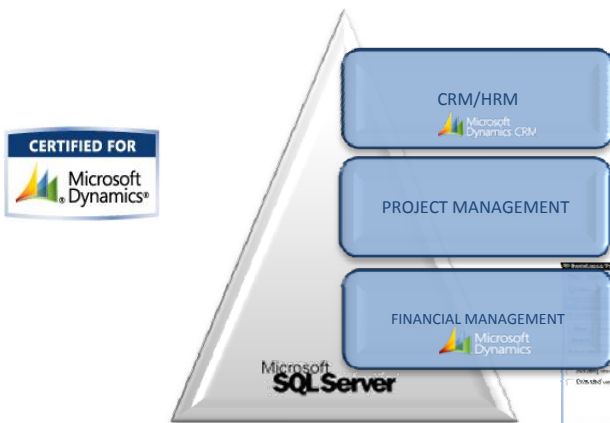

You can include multiple companies in one and the same project administration area. The journaling is carried out by company code.

Record of obligations

Obligations entered into with third parties can be recorded for each project. These obligations can be agreed in advance and then entered in the purchasing register.

Microsoft Dynamics AX™

The Microsoft Dynamics AX™ is an extremely complete platform that is fully integrated with the Enterprise version. This module offers numerous options, such as creating budgets for each ledger, receivables management, multiple dimensions and a fixed assets module.

Integration with Microsoft SharePoint™

Working from the project areas, SharePoint sites can be generated. This integration opens up numerous new options, such as document management and routing and interaction with your customers.
